

August 2008

Fugro Roadware's New US Facility to Open in 2008

For the past several years, Fugro Roadware has serviced all of our products and data services clients from our headquarters in Paris, Ontario, Canada. As a result of our continued growth, we are now in the process of establishing a base of operations in the US to better service our American customers. Our new office in Richmond, Virginia will be fully operational by the end of the year!

Richard Fox-Ivey, Fugro Roadware's Vice President of Sales and Marketing, will be responsible for the set up and ongoing operation of the new location. Richard has been with Fugro Roadware for nearly a decade, and will ensure that our home in Richmond will be staffed and equipped to efficiently manage the projects of our current and future North American data collection services clients. Our new facility will include service bays for minor ARAN fleet maintenance, and a spare parts depot to maximize uptime. As well, several key data services staff will also be stationed at the Richmond office.

Fugro Roadware's Canadian operation will continue to be the Center of Excellence for Fugro Pavement Management data processing and ARAN product development and support. The Canadian operation will continue to process the data collected by the ARAN fleet (currently numbered at 14, but still growing!), build and upgrade ARAN equipment and provide customer support for our clients worldwide, and conduct research and development through the Fugro Pavement Management Services Engineering Department. Fugro Roadware has continually embraced change, new technologies, and developed process improvements to better service our clients, and we will continue to do so. We are excited with the changes to our company, and with the prospect of providing industry-leading road infrastructure data collection equipment and services to our existing clients and to our future clients.

Fugro Roadware is ready to work with you towards achieving your road infrastructure management goals. Give us a call at 800-828-2726, e-mail us at info@roadware.com, or speak with us at the [National Workshop on Highway Asset Inventort and Data Collection](#), or at [other conferences](#) we will be attending.
